We’re lining up influential speakers for next year’s Session in New York City. Mark your calendars NOW!

The theme of the 2017 Session is “Bioesthetics™: From Teeth to Toes”

We can anticipate an exciting time in New York with our Annual Session Chair Jeff McClendon. He’s working hard to line up some of the world best speakers in Bioesthetics™. Among them:

- **World-renown Nobel Prize Winner Steven Chu.** He is currently Professor of Physics and Professor of Molecular & Cellular Physiology in the Medical School at Stanford University.

- **Holly Spence, PT, PRC** has been practicing physical therapy for 29 years and is passionate about helping others and inspiring doctors to share her compassion.

- **Dr. Jay Harris Levy’s** curiosity about the chewing system led him to create a comprehensive model of it and also a research program that explores the sensory properties of the teeth.

- **Dr. Larry Gottesman** has co-authored the acclaimed two-part article, “Progressive Mandibular Retrusion—Idiopathic Condylar Resorption” which was published in the American Journal of Orthodontics in July and August of 1996.

- **Dr. Gayle P. Myers** specializes in holistic medicine. She has more than 25 years of post-graduate training in Biodynamics of Osteopathy in the cranial field.

- **Dr. Doug J. Knight** lectures nationally and internationally on interdisciplinary dentistry and dental esthetics.

- **Dr. Dara Chira** is a board-certified orthodontist in private practice in Burlington, VT. She earned her Certificate in Orthodontics in 1995 from NYU College of Dentistry. In 1998, Dr. Chira completed an advanced 2-year program in occlusion and TMJ from the Roth/Williams Center in Functional Occlusion.

- **Michael J. Gunson, DDS, MD** has lectured and published research on the surgical correction of OSA, the three dimensional airway changes associated with surgical correction, the medical and surgical treatment of mandibular condylar resorption and facial diagnosis and treatment planning.

- **Jeff McClendon, DMD, FAGD, ABGD**, himself, specializes in the new dimensions in MAGO design and fabrication.
